EnviroSmart is a step-by-step environmental education resource providing an action template for teachers and students to develop, implement and report on a **S**chool **E**nvironmental **M**anagement **P**lan (SEMP). It encourages students to examine the environmental management practices within their local community and the Australian minerals industry under the themes – **Water, Waste, Energy, Land** and **Air**.

A supporting website – www.minerals.org.au contains case studies of environmental management at Australian mine sites and provides a context for action at the school level.
Participating schools are encouraged to apply for recognition as an **EnviroSmart** school.

EnviroSmart consists of a booklet of information and student worksheets, two posters, curriculum links and online access to environmental management at mine sites in Australia.

Order your copy of EnviroSmart today

Minerals Council of Australia
PO Box 4497, Kingston ACT 2604
