

MINERALS  
EDUCATION  
VICTORIA

# Properties of Metals

- Use the Venn diagram to compare two different metals.
- Refer to the **Rockfiles** website [www.minerals.org.au/victoriaeducation/teacher\\_services/resources](http://www.minerals.org.au/victoriaeducation/teacher_services/resources) click on the 'Rock Files' which will give you information on the properties of metals.
- Suggested metals to compare include any combination of aluminium, iron, silver, lead, tin, copper, titanium, nickel, zinc or gold.
- An example is given below:

**CHALLENGE:** Construct a Venn diagram to compare the properties of three different metals.
