

WOMEN IN ENGINEERING SCHOLARSHIP

Peabody Australia, in partnership with the Minerals Council of Australia, the national body representing Australia's mining and minerals processing industry, invites students from the University of Wollongong to apply for the Peabody/Minerals Council of Australia Women in Engineering Scholarship.

The Peabody/MCA partnership is helping identify the next generation of talented female engineers. The scholarship is open to all female undergraduate engineering students studying in Australia and provides \$8000 per annum for the final two years of study. To be eligible for the Women in Engineering Scholarship, you must:

- Be currently enrolled in full-time study in an Engineering degree (Mining, Electrical, Environmental, Mechanical etc).
- Be in the final 2 years of an Engineering degree
- Have a GPA of 5 or more (or equivalent to 65% or more)
- Include an accompanying CV

Applications close 21 May 2018

To submit your application for the Peabody/MCA Women in Engineering Scholarship, complete this form and send with accompanying CV to jillian.durso@minerals.org.au

WOMEN IN ENGINEERING SCHOLARSHIP

For more information, you can contact Jillian at the Minerals Council of Australia on **03 8614 1805**.

Content to be updated

- 1. What do you see as the biggest challenge facing the coal industry at the moment and what can you do to address it?**
- 2. Please outline your long term career aspirations:**
- 3. What has been your biggest achievement to date and how do you see this as contributing to your long term career goals?**
- 4. Successful recipients of the Peabody/MCA Women in Engineering Scholarship will be provided an opportunity to undertake an undergraduate/vacation program with one of Peabody's Australian based operations during the 2018/2019 summer period. As this will require you to work in a regional/remote area, we would like you to confirm below that you are able to meet this requirement.**
- 5. The scholarship winner will also be required to undertake promotional duties with The Minerals Council of Australia, including domestic travel from time to time. Would you be comfortable fulfilling such activities?**
